

# Vocabulary!

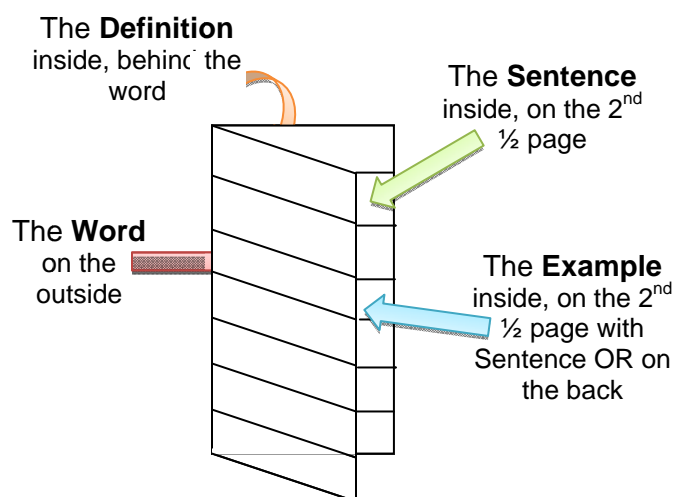

When learning a new subject, knowing the words commonly used in that field will help you to comprehend the subject better. This is especially true in science. You will be responsible for knowing (& using!) key vocabulary terms for each unit.

For all vocabulary words in this class, you will be responsible for 4 things:

1. **The Word** (obviously!)
2. **The Definition** – use your textbook or a dictionary to find this.
3. **A Sentence** – Using the word, write a sentence that makes sense to you. Don't just copy 😊
4. **An Example** – something to help you remember the word's meaning... draw a picture or write a synonym of the word.

Below are some things you can do to help yourself learn, remember, and use these words (as well as earn full points on your vocab check!)

Flip Book

Vocab Quilt

The <b>Word</b> written neatly	A <b>Drawing</b> relevant to the definition of the word
The <b>Definition</b> complete, from dictionary / text	<b>Word Association</b> Helps to understand/makes sense of the word

Chart

Word	Definition	Sentence	Example

Any other format that includes all 4 parts & will help you remember the term 😊
