

(Dick p. 110) The two functions f and g have graphs as shown above. Fill out the table for the defined function $h(x)$ in exercises 1-8 and complete the graph for $h(x)$ in exercises 3-8 on the given axes over the interval $[-3, 3]$.

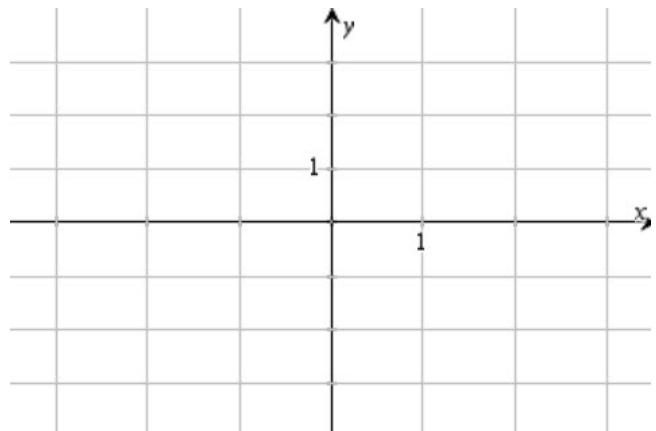

1. $h(x) = f(x)$

Input $x = a$	Output $h(a)$	Left-hand Limit $\lim_{x \rightarrow a^-} h(x)$	Right-hand Limit $\lim_{x \rightarrow a^+} h(x)$	Limit $\lim_{x \rightarrow a} h(x)$	Is $h(x)$ continuous at $x = a$?
